

## Writing Algebraic Terms: Multiplication

Simplify the following algebraic expressions by first writing them as a multiplication

**e.g.  $a + a + a = \underline{3 \times a} = \underline{3a}$**

1)  $b + b + b + b = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2)  $c + c + c = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3)  $d + d + d + d + d = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4)  $e = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

5)  $f + f + f + f + f + f = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

6)  $g + g + g + g + g + g + g + g = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

7)  $h + h + h + h + h + h + h = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

8)  $i + i + i + i + i + i + i + i + i + i = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$
